### **DETAILED ACTION**

This Office action is in response to applicant's patent application filed on 6/9/2005.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 7/12/2006 is being considered by the examiner.

#### ***Specification***

The title of the invention is objected to because of the quotation marks.

Correction is required.

The specification is objected to because it lacks of headings. Correction is required.

#### ***Claim Objections***

Claims 4-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-11 not been further treated on the merits.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

As best understood, claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 4,441,293 to McQueen et al.

Claim 1:

McQueen et al. disclose a panel comprising an insulating core 10, two outer faces 11 made of metallic sheet (see col. 2, lines 26-27) disposed on opposite sides with respect to said core, characterized in that it comprises a cushion of mineral wool 13 (col. 1, line 63) interposed between at least one of said outer faces and the insulating core (Figs. 1-4).

Claim 2:

Wherein the cushion of mineral wool is fixed to the adjacent face of the panel (Figs. 1-4).

Claim 3:

Wherein the cushion is fixed to the face of the panel by means of adhesive (col. 1, lines 38-44).

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
